

Nile River

By: Roslyn Martinez
Mrs. Q's Class

It is amazing how long the Nile River flows. It is so amazing that it is called three different names. How cool is the Nile River. It goes to the Mediterranean Sea and goes through different countries of Africa. It goes through Ugand, Sudan, and Egypt. We all know that the daughter of the Nile River is Cleopatra.

The Nile River flows into and it goes to the Mediterranean Sea. While it travels through Ugand, Sudan, and Egypt. It is having three different names like the Blue River, the White River, and the Nile River. The Nile River is the longest river in the entire world. The river flows for (4,160 miles) (6,695 kilometers). 70% of the Niles water comes from the Blue Nile. From the fertile banks of the Nile rose one of the

world's first great civilizations. The Nile floods areas in the summer.

The Nile River is a very great river. I chose this river because it has been a very long time since Cleopatra the daughter of the Nile River was alive. It is what people say it is an ancient river. I think that the Nile is very interesting river sense it is the longest river in the world and sense it has 3 different names. It is a very beautiful river.

The Nile River had three different names because it passes through three different countries. And in each country it is called three different names. And it is the largest river in the world now that is interesting. The second largest river in Africa is the Congo those are very popular in Africa. But the most popular one is the Nile.

This is all the facts I found. The largest river in the world. A river that has three names. All of the information is a fact. The Nile is a pretty place where you can go visit. It is going to be a beautiful place.
