Total					975.99

iPod Shuffles: By purchasing as many iPod Shuffles and the \$1,000 limit allows, more students will be able to take home the shuffles in a one week period. I could split the class into thirds and each student would be able to take home the shuffles 2 to 3 times in a week. This quantity would also allow for me to set aside one or two shuffles to be sent home for longer/more frequent use for students who are at-risk, ESL learners, or show a need for more practice.

3068AV Switchable Stereo/Mono Headphones: The headphones are necessary for the students to listen to the shuffles at home. These particular headphones are designed for student use, durable and easy to sanitize.

L.L. Bean Lunchboxes: Zipper, padded lunch boxes will be used as a protective carrying case from school to home. Each iPod shuffle will have a different color lunch case which will make inventorying and assigning the cases to students much easier.

Logitech - USB Desktop Microphone: A microphone is needed for teacher recordings of poems, books, etc.
