

## Universal Technology Access Program Really STACKS UP

It is a giant undertaking, but Cheryl Chandler and her [UTAP Team](#), have made a lot of C-FB ISD students happy. Each week the UTAP Team places computers into the hands of 12 VERY lucky students. The students will use their newly acquired technology at home to assist them with school work. After the students have been selected by their school, they, along with their parents, must attend an evening class to learn set-up and operation instructions of their new equipment.
